

Guidelines for All Nurse Dispensed Medications

Medications on Campus

- All medications kept on campus require a parental consent form filled out and signed prior to being dispensed.
- All medications are to be in the original bottle with a pharmacy label indicating student's name, name of medication and directions as to how the medication is to be dispensed.
- All inhalers and Epinephrine injectables are required to be in the original box with the pharmacy label on the box.

Over the counter medications require either a prescription or physician's instructions to include:

1. Name and date of birth of student
2. Name of medication
3. How the medication is to be dispensed specifically
4. Time or how often medication should be dispensed
5. Medication must be in the original bottle and unopened

Please ensure any medications are within their expiration date. Any expired medications will not be dispensed.

Students may not have any type of prescribed, over the counter medications or holistic medications/vitamins in their backpack, lunchbox or on their person.

All medications are kept in the clinic.
